

MEMORANDUM OF AGREEMENT

Among the

PUEBLO OF SANTA ANA
the
NEW MEXICO INTERSTATE STREAM COMMISSION
and the
UNITED STATES ARMY CORPS OF ENGINEERS

To utilize a portion of the Jemez Canyon Reservoir sediment pool to provide a temporary conservation pool in Jemez Canyon Reservoir to be managed for the benefit of the Rio Grande silvery minnow

This agreement is pursuant to the Flood Control Act of 1948 (Public Law 858-80th Congress, Chapter 771), the Flood Control Act of 1950 (Public Law 516-81st Congress, Chapter 188), and the Flood Control Act of 1960 (Public Law 645-86th Congress, 74 Stat. 493) and is among the Pueblo of Santa Ana, herein referred to as “Santa Ana”, the New Mexico Interstate Stream Commission, herein referred to as the “Commission”, and the U. S. Army Corps of Engineers, herein referred to as the “Corps”.

WHEREAS, Jemez Canyon Dam and Reservoir is a Corps’ constructed and operated facility.

WHEREAS, Jemez Canyon Reservoir lies on Santa Ana lands.

WHEREAS, the Rio Grande silvery minnow is listed as endangered by the U.S. Fish and Wildlife Service.

WHEREAS, the State of New Mexico has presented a draft Settlement Proposal in *Minnow v. Martinez*, No. 99-CIV-1320 (D.N.M.).

WHEREAS, Santa Ana, the Commission, and the Corps support the primary objective of the State of New Mexico’s draft Settlement Proposal, which includes the establishment of a conservation pool for the benefit of the Rio Grande silvery minnow (“Conservation Pool”).

WHEREAS, upstream storage space is needed to facilitate the draft Settlement Proposal.

WHEREAS, storage space is available within the sediment retention allocation of Jemez Canyon Reservoir.

NOW, THEREFORE, it is agreed as follows:

1. That subject to the Commission's authorization or a permit issued by the New Mexico State Engineer, and subject to and contingent upon the continuing full force and effect of separate agreements between the United States and the State of New Mexico relative to the *Minnow v. Martinez* settlement agreement, the Corps will store and release native Rio Grande Basin water in Jemez Canyon Reservoir.
2. That in the event that a settlement proposal is not executed prior to June 30, 2001, all parties agree to evacuation of water stored under the terms of this agreement between November 1, 2001, and March 1, 2002, at times and in quantities specified by the Commission after consultation with the Santa Ana Pueblo and the Corps.
3. That the Commission will seek and this agreement is subject to receiving the advice and consent of the Rio Grande Compact Commission for deviation of normal operations of Jemez Canyon Reservoir for a term of not more than three years to allow establishment and operation of the Jemez Canyon Reservoir portion of the Conservation Pool.
4. That water stored in the Conservation Pool ("Conservation Pool Water") will be managed to support efforts to conserve and recover the Rio Grande silvery minnow.
5. That Conservation Pool Water stored in the Jemez Canyon Reservoir ("Jemez Conservation Pool Water") will be released from storage proportionally with Conservation Pool Water stored in other reservoirs.
6. That Santa Ana and the Corps accept no responsibility for procedures or methodology used in accounting for the Jemez Conservation Pool Water.
7. That Santa Ana and the Corps accept no responsibility for the seepage, leakage, evaporation, and transpiration losses of Jemez Conservation Pool Water.
8. That storage, regulation, and the releases will be accomplished with the existing service gates and that the Corps will not be liable or responsible for any loss of Jemez Conservation Pool Water due to any malfunction of the service gates or inspection and maintenance of the gates that may be necessary to assure the proper and safe operation of the project.
9. That Jemez Conservation Pool Water shall be considered temporarily stored.
10. That the Corps may evacuate the Jemez Conservation Pool Water, or any portion thereof, as necessary to meet flood control operations or emergency situations, including but not limited to operations to permit maintenance or repair of the dam or appurtenant structures. The emergency situations discussed above specifically exclude releases for endangered or listed species emergencies.

11. That the Corps will continue to pursue a long-term solution to the ponding and drainage problem behind the levee that protects Tamaya Pueblo and that actions taken will be satisfactory to Santa Ana.
12. That the Corps and Santa Ana will continue to work together in efforts to mitigate effects resulting from the termination of the sediment retention pool.
13. That the Commission and the Corps will support Santa Ana in its desire to rename Jemez Canyon Dam and Reservoir to Tamaya Canyon Dam and Reservoir in order to comport with Santa Ana's traditional designation of the area.
14. That the Commission will support funding requests by Santa Ana for habitat restoration efforts which directly contribute to the protection and recovery of the Rio Grande silvery minnow and the Southwestern willow flycatcher.
15. That the State of New Mexico, in its sole discretion, may assign any permit it may obtain in connection with this agreement to the U. S. Bureau of Reclamation.
16. That the term of this agreement is from the date of signature by all three parties until January 31, 2004, unless modified by unanimous consent of the signatories, and that this agreement may be executed in multiple counterparts.
17. That nothing in this agreement shall affect any party's rights under New Mexico, federal or tribal law; and that nothing in this agreement shall be construed or applied in a manner that is inconsistent with New Mexico, federal or tribal law, that will affect the obligations of the United States to Santa Ana or that will impair the rights of Santa Ana.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be duly executed.
